DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 2,3,5,6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al.
 - Anderson discloses the claimed invention except for the recitation of the orientation of the structural elements and a recitation of a second light source in the upper element. Anderson discloses a lower portion (fig 2, area around 20), an upper portion (16,18), the lower portion having at least one lamp to illuminate the space beneath, one or more side panels on one of the portions for supporting at least one advertising sign (20.23), where the lower portion is dome shaped and the upper portion is rectangular (figs 1,2). It would have been obvious to one of ordinary skill in the art at the time the invention was made to invert the upper and lower portion of Anderson for that of the instant invention, since it has been held that rearranging parts of a prior art structure involves only routing skill in the art.

 In re Japikse, 181 F.2d 1019, 86 USPQ 70 (CCPA 1950). Furthermore it appears that the device of Anderson would work equally as well as configured for the purpose of providing an advertising medium. With regards to the upper portion having an additional light source, It would have been obvious to one of ordinary

Art Unit: 2875

skill in the art at the time the invention was made to add a light source to the upper portion of Anderson since it has been held that mere duplication of essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8. Furthermore an additional light source would increase the light output of the lamp to enhance the advertising area's appearance.

- The corners of the dome shaped lower portion of Anderson are providing with support members (20,23) and curve downwardly towards the peak of the dome shaped lower portion. With regards to an opaque side panel extending between each pair of support members, Anderson discloses translucent signs between each pair of support members, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the side panel of Anderson to include and opaque panel instead of a translucent one since the courts have stated that matters relating to ornamentation only which have no mechanical function cannot be relied upon to patentably distinguish the claimed invention from the prior art. *In re Seid*, 161 F.2d 229, 73 USPQ 431 (CCPA 1947). Furthermore, an opaque panel would futher magnify the side panels to be illuminated.
- At least one side panel is removable (fig 2,18);

Allowable Subject Matter

Claim 7 is allowed.

Art Unit: 2875

4. The following is a statement of reasons for the indication of allowable subject

matter: The reasons can be found in the office action dated 4/20/05.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Anabel M. Ton whose telephone number is (571) 272-

2382. The examiner can normally be reached on 08:00-16:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
